GROPRO ORGANICS NAMED ORGANIC FERTILIZER PROVIDER BY ST. TIMOTHY'S SCHOOL

OWINGS MILLS, MD – St. Timothy's School, a college preparatory school for girls, today introduced GroPro Organics as the exclusive provider of organic fertilizer for the school's athletic fields. The Stevenson, MD, school joins Ripken Baseball, golf courses and countless homeowners who have discovered the virtues of all-natural, non-toxic, soil amendments.

"Not only does St. Timothy's teach our students to be stewards of the environment, we also practice what we teach," said Martin Lotz, III, St. Timothy's facilities engineer "The soil amendments from GroPro are organic -- safe for the girls and safe for the environment."

"We are delighted to be working with St. Timothy's," said David Fleischmann, co-founder and president of Owings Mills-based GroPro. "Our products are safe, non-toxic and really work."

Landscaping professionals, like those at St. Timothy's, choose GroPro Organics because the results are real:

- Increased nutrient uptake
- Suppressed lawn diseases
- Reduction of water consumption

“Quenching the Thirst of Mother Earth™”

Imagine a 40,000-year-old compost heap. That’s GroPro. Microbe-rich, nutrient-rich, all-organic peat that delivers humic and fulvic acids – vital for healthy root growth and lush, green turf. GroPro Organics’ Strong Lawn products come straight from the earth.

GroPro Organics products’ make the soil healthier and more absorbent. Synthetic, oil-based fertilizers leach dangerous chemicals, poisoning the ecosystem. GroPro is the natural way to improve your lawn and help the environment.

GroPro products are available for residential use. “In this economy, the back yard is the vacation, the summer camp, ground zero for the staycation.” said Larry Meyer, GroPro Organics co-founder and CEO. “People want a beautiful back yard without harming the environment nor exposing their families to dangerous chemicals.”
